

# 1,000,000 MILE ENGINES

*The dream of a million miles without a major overhaul is a reality with the technology in Schaeffer Oil.*

From the many base stocks on the market, Schaeffer selects only the top of the line. **SUPREME 7000** is a blend of 100% pure paraffin base **PLUS** the finest quality synthetic base stocks. In addition, it incorporates the finest quality additive technology.

**The result:** *An oil for the 21st century that extends engine life and oil life.*

*In 1985, in Meridian, ID, Gus Hackler Trucking had the first Cummins engine to turn a million miles without a major overhaul.*

In the Summer of 2001, President/owner of D.D. Mitchell Enterprises LTD (Denis Mitchell) became another "Million Mile Man" through the use of Schaeffer's Supreme 7000 15W-40. Mitchell's 1992 Peterbilt 379 with a Caterpillar 3406B shown above and below is still going strong today at over 1,057,000 miles.

## 20,000 hour engines

To date, Beaver Materials Concrete Company has 6 concrete trucks with over 20,000 hours logged without a major overhaul. That is equivalent to 1,000,000 miles on an over-the-road truck because of the hours of continuous idling on a job site. This was accomplished while extending oil drains from 250 to 400 hours.

*To date, Gus Hackler has had a second Certified Million Mile Engine and a third at 826,119 is quickly approaching the mark – all on 24,000 mile oil drain intervals.*

**From one million miles over-the-road to 20,000 hours off-highway, the technology in **Schaeffer oil** extends engine life and oil life.**
